

The XPENG X9 Ultra Smart Large Seven-Seater

Intelligently Moving Your World

5th March 2025 – Bermaz Xpeng Sdn Bhd, the sole distributor of the XPENG brand in Malaysia, is proud to announce the official launch of its latest XPENG flagship model, the XPENG X9 Ultra Smart Large Seven-seater. The X9 is now available for booking with a starting price of RM 269,888.00*.

Built on XPENG's advanced SEPA 2.0 architecture, the X9 redefines the MPV segment with groundbreaking innovations in design, intelligence, space, handling, and safety. Combining cutting-edge technology with versatility, it sets a new standard for modern MPVs, pushing the boundaries of automotive excellence.

Exterior

The XPENG X9 features a futuristic yet practical design, blending sleek aesthetics with advanced technology. Its streamlined silhouette, flowing lines, and distinctive "Starship" frame create a bold statement of modern elegance and innovation.

XPENG's signature "Robot Face" front fascia is highlighted by a seamless horizontal daytime running light, visually extending the vehicle's width. A crystal grille with a layered design, paired with an Active Grille Shutter (AGS) system, enhances aerodynamics for improved efficiency and performance. The X9's youthful, dynamic look is emphasized by a sharply angled A-pillar,

floating roof, and expansive side windows. A 23° coupé-style rear windshield ensures a smooth ride, while a continuous tail light bar enhances both style and visibility.

Interior

The X9's interior combines luxury and advanced technology, inspired by a starship cockpit. Its all-in-one center console offers an intelligent and immersive driving experience, enhanced by premium materials like wood veneer and aluminum air vents for a modern, minimalist aesthetic. A 21.4-inch entertainment screen, customizable ambient lighting, and an advanced air purification system create a comfortable atmosphere, while the 23-speaker X-Opera Sound System delivers concert-like audio.

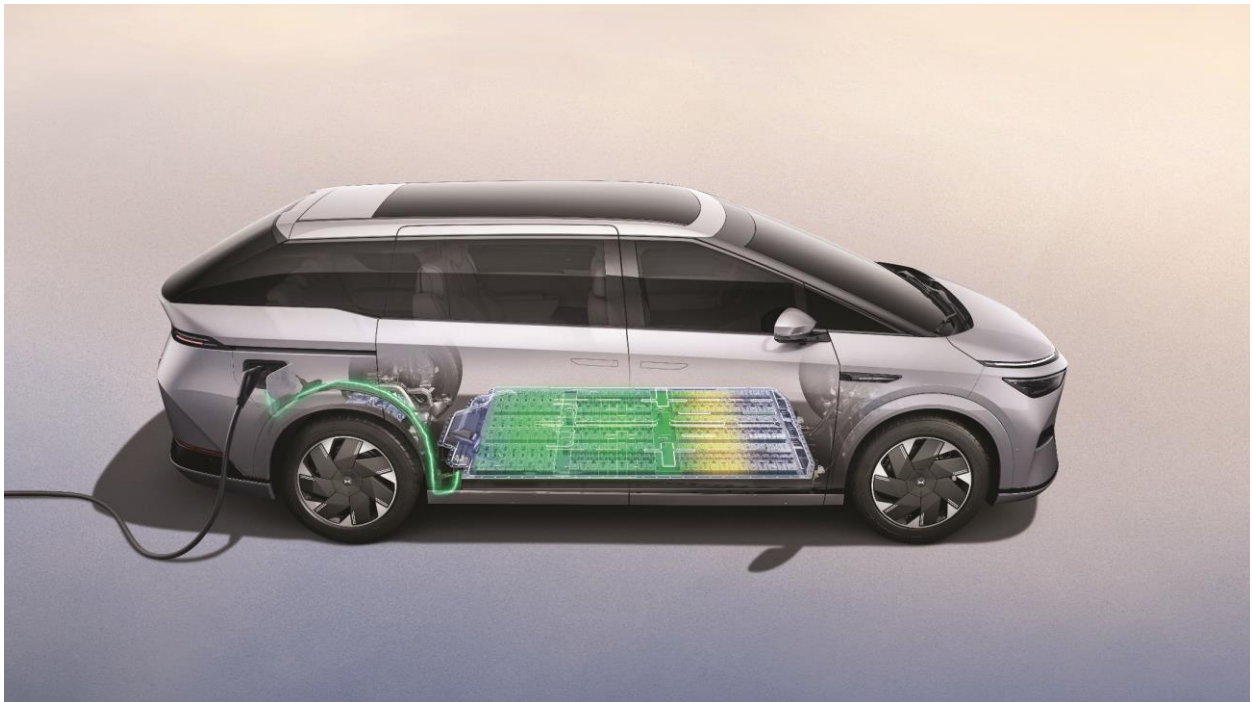

Designed as a new breed to meet the needs of both individual and family travel, the XPENG X9 can also be configured from a spacious 7-seater into an ultra-spacious 4-seater SUV with a single click, by electrically folding the third-row seats. This expands the boot volume from 755 litres to 2,554 litres, making it suitable for various user needs, from transporting furniture items like basic storage solutions and accent pieces to travelling with a dozen 20-inch suitcases with ease. Ergonomic Zero Gravity seats, an electric third-row adjustment system, and a built-in massage function ensure ultimate comfort. A smart refrigerator adds convenience, making the X9 perfect for family trips.

Superior Handling

The XPENG X9 boasts a world-first active rear-wheel steering system paired with an intelligent dual-chamber air suspension, enabling an impressively tight 5.4m turning diameter. This exceptional manoeuvrability allows the X9 to navigate tight parking spaces effortlessly, making U-turns even on congested streets or narrow roads with the agility of a much smaller car. Additionally, its suspension system automatically adjusts spring stiffness based on road conditions, ensuring a smooth and comfortable driving experience in any environment.

Superfast Charging & Safety

The Xpeng X9 is the brand's new flagship MPV, built on the advanced SEPA 2.0 architecture and featuring an 800V high-voltage silicon carbide (SiC) platform for ultra-fast DC charging. The Standard Range 2WD Pro variant comes with an 84.5 kWh LFP battery, offering up to 500 km of range, 450 Nm of torque, and 315 hp, while the Long Range variants feature a larger 101.5 kWh NMC battery, extending the range to 590 km with the same power output.

With cutting-edge energy optimization and thermal management, the X9 supports rapid charging, with DC charging capacities of up to 317 kW, enabling a 10-80% charge in just 20 minutes. It is also the world's first BEV 7-seater MPV to feature a front and rear-integrated die-cast aluminum body structure, enhancing safety and durability.

The XPENG X9 prioritizes safety with both standard and advanced features under the XPILOT 2.5 system. Standard safety includes six airbags and an electronic child lock, while advanced driver assistance utilizes high-definition radar, ultrasonic sensors, and a 360° HD camera powered by the Nvidia Orin-X chipset for enhanced situational awareness.

The XPENG X9's XPILOT advanced driving safety system enhances confidence and road safety with cutting-edge features. It includes Adaptive Cruise Control (ACC) with Stop & Go, Lane Centering Control (LCC), Adaptive Turning Cruise (ATC), Intelligent Speed Limit Assist (SAS), and Active Lane Change (ALC) for a seamless driving experience.

For parking, the X9 offers Enhanced Auto Parking Assist (EAP 2.0), Auto Exit Parking Assist (AEP), and Straight Summon, all accessible via the XPENG mobile app for effortless maneuvering.

XPILOT also integrates a comprehensive safety suite, including Forward Collision Warning (FCW), Autonomous Emergency Braking (AEB), Blind-Spot Detection (BSD), Lane Keeping Assist (LKA), and Rear Cross-Traffic Alert (RCTA), ensuring maximum protection for both drivers and passengers.

The XPENG X9 Ultra Smart Large Seven-Seater is a fully imported (CBU) model from China, available in three striking exterior colors: Nebula White, Crescent Silver, and Dark Night Black.

The XPENG X9 boasts a premium and spacious cabin, crafted with high-quality materials. It offers two elegant interior color options: Starry Night Black and Moon Shadow Brown. The Standard Range 2WD Pro and Long Range 2WD Pro variants feature leatherette upholstery, while the Long Range 2WD Pro Plus elevates luxury with full-grain Nappa leather Zero Gravity Seats, ensuring unmatched comfort and sophistication on every journey.

With a starting price of RM 269,888.00*, the XPENG X9 is now available for booking at your nearest XPENG showroom. For added peace of mind, the X9 comes with a 5-Year Manufacturer Warranty (or 120,000 km, whichever comes first) and 5-Years Free Service and Maintenance (or 100,000 km, whichever comes first). Additionally, it includes an 8-Year High Voltage Battery Pack Warranty with a 160,000 km mileage limit, ensuring long-term reliability and performance.
